## Education

### Università degli Studi di Roma "La Sapienza"

Rome, Italy

BACHELOR IN COMPUTER SCIENCE

Set 2023 - Oct 2026

- Built a strong foundation starting from the study of computer architecture and operating systems, progressing to programming languages (Python, Java, C, Flutter, Dart), software development, and database management. Complemented by solid theoretical knowledge in algorithms, computer networks, and mathematical analysis, enabling structured approaches to complex engineering and scientific problems.

## Work Experience

### Inovcorp

Lisbon, Portugal

FULL-STACK DEVELOPER

May. 2022 - Jun. 2022

- Engineered and maintained a full-stack web application using the Laravel PHP framework.
- Designed and implemented the core RESTful API and database schema to manage search parameters, data interactions, and remote API calls.
- Developed a comprehensive search feature allowing users to query and retrieve detailed information (characters, starships, etc.) from an external source, ensuring accurate data parsing and presentation.
- Managed the entire development lifecycle, from conceptualization to deployment.

### Euromacchine

Oderzo, Italy

SOFTWARE DEVELOPER

Aug. 2023- Sep. 2023

- Developed a cross-platform mobile application using Flutter and Dart for real-time control and monitoring of industrial machinery (pumps).
- Implemented robust Bluetooth/Serial communication protocols to send commands to and receive data from an Arduino microcontroller connected to the pump system.
- Designed and integrated a secure authentication/login system and an intuitive graphical interface (GUI) for user interaction.
- Enabled both active interaction (e.g., turning the pump ON/OFF) and passive monitoring (e.g., reading real-time values like RPM, Temperature, and other sensor data).
- Ensured data visualization and logging capabilities for performance analysis and diagnostics.

## Honors & Awards

### EUROPEAN

2023 **1st Place**, European Robocup Junior

Varazdin, Croatia
